Third Quarter 2018 Earnings Conference Call

October 31, 2018

Forward-looking statements

- Today's presentation includes forward-looking statements that reflect Bunge's current views with respect to future events, financial performance and industry conditions.

- These forward-looking statements are subject to various risks and uncertainties. Bunge has provided additional information in its reports on file with the Securities and Exchange Commission concerning factors that could cause actual results to differ materially from those contained in this presentation and encourages you to review these factors.

CEO's comments

Q3 performance:

- **Oilseeds driven by strong soy crush margins, benefitting from Q2 actions; Grain higher than than expected, primarily due to Brazil origination**
- **Milling had a strong quarter on higher margins in Brazil; Edible Oils impacted by surplus of soy oil due to strong global crushing environment**

Continue to execute on our strategy

- **Focus on value-added**
  - Loders Croklaan integration progressing well
  - Exited sugar trading business
- **Improving organizational effectiveness**
  - Global Competitiveness Program progressing faster than expected; should achieve targeted baseline SG&A in 2019 – one year ahead of plan
  - Industrial/supply chain savings on track
  - Disciplined capital allocation to drive returns back above WACC by year-end

Expect good close to the year; core Agri-Foods ROIC > WACC by year-end

- **Agribusiness to be driven by Northern Hemisphere oilseeds processing**
- **In Food & Ingredients, oil supplies tightening and entering period of seasonally stronger demand**

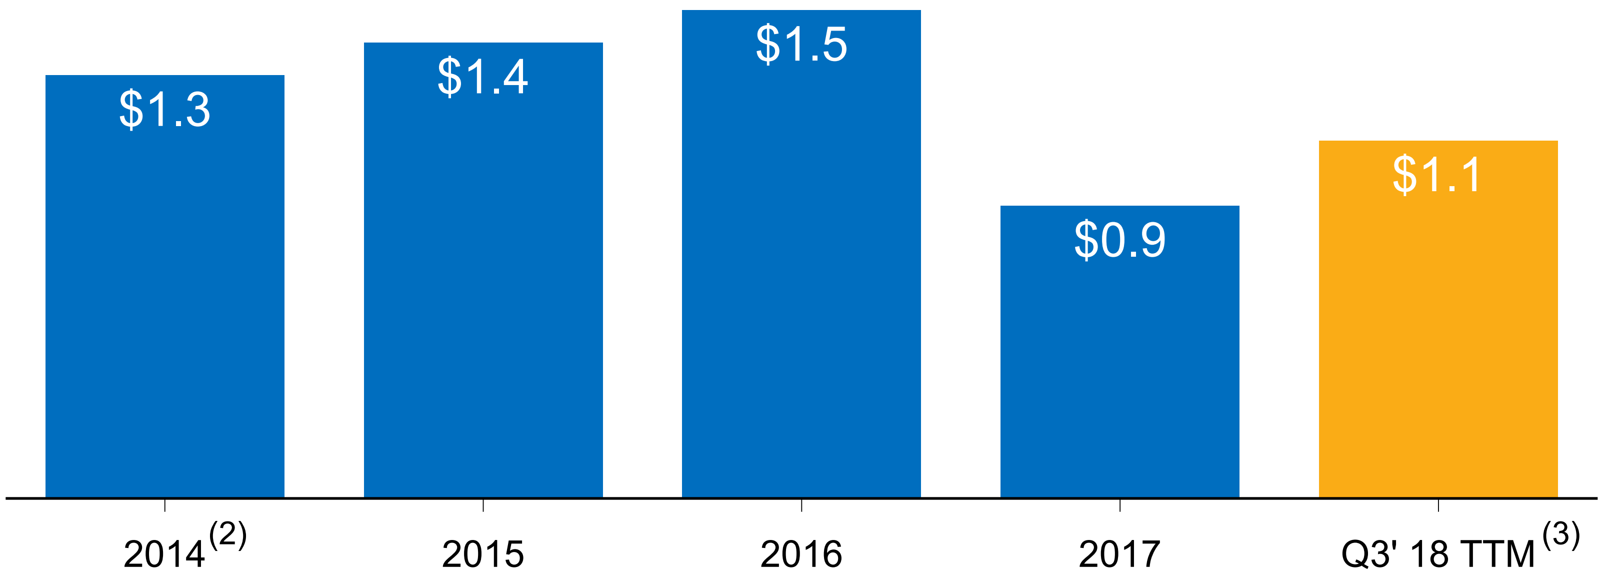
Bunge Limited cash flow highlights

Adjusted Funds From Operations (Adjusted FFO) [1]

$ billions



(1) Adjusted Funds From Operations is a non US GAAP measure. Reconciliation to the most directly comparable U.S. GAAP measure is provided in the appendix. Adjusted FFO = Cash flow from operations before working capital changes and before foreign exchange loss (gain) on debt.
(2) Adjusted FFO includes adjustments for certain gains & charges
(3) Trailing Twelve Months (TTM) Adjusted FFO is calculated by adding the Adjusted FFO of last four quarters.

BUNGE

Right balance: disciplined capital allocation

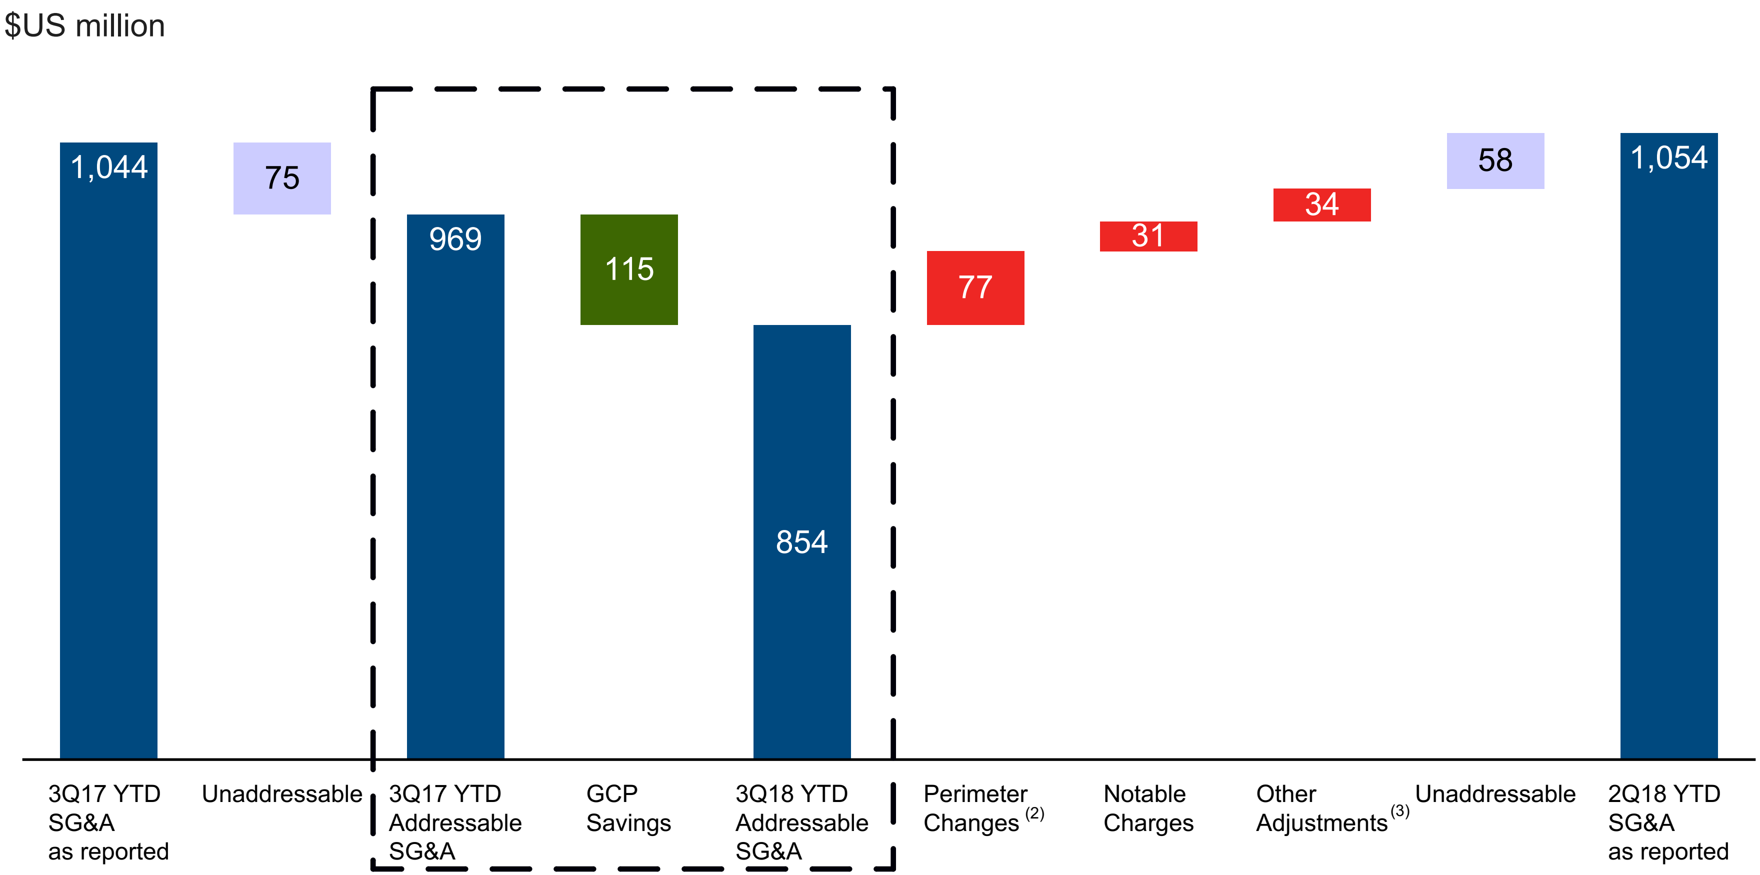
BUNGE

Global Competitiveness Program update - Sep YTD[1]

Increasing savings target by $25 million to $175 million in 2018 vs. 2017 Addressable Baseline



Expect to achieve targeted baseline of $1.1B a year ahead of plan

(1) See Additional Financial Information section in the earnings press release
(2) Perimeter changes, primarily reflects the acquisition of Loders Croklaan
(3) Other adjustments primarily include FX, inflation and variable compensation

BUNGE

2018 Outlook[1]

Expect full-year EBIT of ~$1.2B, exceeding 2017 by ~$600m, with core Agri-Foods ROIC exceeding WACC

Agribusiness

- Expect full-year EBIT in the upper half of the range of $800 million to $1.0 billion
  - Oilseeds to be driven by Northern Hemisphere soy and softseed processing
  - Grains poses some uncertainty
    - Evolving freight price situation in Brazil, as well as recent strengthening of BRL slowing pace of new crop pricing
    - Impact of U.S.-China trade situation on U.S. exports
  - Soy crush margins should stay strong into next year
    - Soymeal competitively priced vs competing proteins
    - Argentine processors expected to continue to crush in pace with farmer selling

---

Food & Ingredients

- Reducing full-year EBIT to range of $250 to $270 million
  - Softer than expected Q3 in Edible Oils
  - Slower than expected pace of margin expansion in Brazil Edible Oils
  - ~$10 million negative impact from the revaluation of raw material supply contracts that are expected to largely reverse in future quarters

(1) Savings from Global Competitiveness Program and industrial and supply chain initiatives are included in segment EBIT ranges

BUNGE

2018 Outlook[1]

Sugar & Bioenergy

- Decreasing full-year EBIT to a loss in the range of $20 to $40 million
  - Lower expected cane crush due to drought and recent heavy rains, increasing unit costs and reducing production
  - Includes a year-to-date loss of ~$25 million in trading & distribution

Fertilizer

- Increasing full-year EBIT to ~$35 million
  - Higher than expected volumes and margins

Other

- Capex: ~$600 million, which is an additional reduction of $50 million
- Net interest expense: increasing range to $310 to $315 million
- Tax rate: upper end of the range of 18% to 22% based on earnings mix

1. Savings from Global Competitiveness Program and industrial and supply chain initiatives are included in segment EBIT range

BUNGE

CEO's conclusion

- **Q3 2018 was a strong quarter**
- **See continued favorable market conditions through year-end and into 2019**
- **Strategic refinement of the portfolio sharpens our focus on core businesses where we can deliver the greatest value**
- **Productivity, cost initiatives running ahead of plan; will improve competitive position and drive EPS growth**

Non-GAAP reconciliations

Non-GAAP measures

- Bunge uses total segment earnings before interest and taxes ("Total Segment EBIT") and Total Segment EBIT, adjusted to evaluate Bunge's operating performance. Total Segment EBIT is the aggregate of each of our five reportable segments' earnings before interest and taxes. Total Segment EBIT, adjusted is calculated by excluding certain gains and charges from Total Segment EBIT. Total Segment EBIT and Total Segment EBIT, adjusted are non-GAAP financial measures and are not intended to replace net income (loss) attributable to Bunge, the most directly comparable U.S. GAAP financial measure. Bunge's management believes these non-GAAP measures are a useful measure of its reportable segments' operating profitability, since the measures allow for an evaluation of segment performance without regard to their financing methods or capital structure. For this reason, operating performance measures such as these non-GAAP measures are widely used by analysts and investors in Bunge's industry. These non-GAAP measures are not a measure of consolidated operating results under U.S. GAAP and should not be considered as an alternative to net income (loss) or any other measure of consolidated operating results under U.S. GAAP.
- Net income (loss) per common share from continuing operations-diluted, adjusted, excludes certain gains and charges and discontinued operations and is a non-GAAP financial measure. This measure is not a measure of earnings per common share-diluted, the most directly comparable U.S. GAAP financial measure. It should not be considered as an alternative to earnings per share-diluted or any other measure of consolidated operating results under U.S. GAAP. Net income (loss) per common share from continuing operations-diluted, adjusted is a useful performance measure of the Company's profitability.
- Adjusted Funds from Operations (Adjusted FFO) is calculated as cash flow from operations before working capital changes and before foreign exchange loss (gain) on debt. Adjusted FFO is a non-U.S. GAAP financial measure, the most directly comparable U.S. GAAP financial measure is Cash provided by (used for) operating activities in the Condensed Consolidated Statements of Cash Flows. Bunge's management believes this is a useful measure of its cash generation, since it excludes the impact of commodity price volatility, which can cause working capital levels to vary significantly from period-to-period.
- To supplement its reporting of financial measures determined in accordance with GAAP, Bunge may also refer to forecasted cash accretion and EBITDA of Loders Croklaan. EBITDA refers to Loders' earnings before interest, taxes, depreciation and amortization; and cash accretion reflects the expected impact of the transaction on our earnings, excluding step-up amortization. The EBITDA and cash accretion measures also exclude estimated transaction costs. Management believes this information is useful to investors for their independent evaluation and understanding of the transaction with Loders. This information is provided only on a non-GAAP basis without a reconciliation of these measures to the mostly directly comparable GAAP measures due to the inherent difficulty, without unreasonable efforts, in forecasting and quantifying certain amounts that are necessary for such reconciliations, including adjustments that could be made for items such as foreign exchange effects, mark-to-market adjustments, transaction and integration costs, restructuring costs, timing of capital expenditures and other items. These items depend on highly variable factors, many of which may not be in our control, and which could vary significantly from future GAAP financial results.

Note: Refer to Non-GAAP Reconciliation on slide 21 for a reconciliation of income from continuing operations before income tax to return before income tax, adjusted.

(1) See Additional Financial Information section included in the earnings press release.

(2) Effective tax rates of 20% and 13% for 2018 and 2017 respectively, reflect company's normalized rate, which excludes certain gains & charges.

(3) Bunge calculates return on invested capital (ROIC) by dividing return after income tax, adjusted by the quarter ended average total capital for the trailing four quarters preceding the reporting date. Return after income tax, adjusted is calculated as income from continuing operations before income tax, including non controlling interest, for each of the trailing four quarters plus the related interest expense and excluding certain gains & charges, times the effective tax rates for those periods. Average total capital is calculated by averaging the totals of the ending balances of shareholders equity, noncontrolling interest and total debt for each quarterly period. Bunge believes that ROIC provides investors with a measure of the return the company generates on the capital invested in its business. ROIC is not a measure of financial performance under generally accepted accounting principles and should not be considered in isolation or as an alternative to net income as an indicator of company performance or as an alternative to cash flows from operating activities as a measure of liquidity.
